COLOR SCHEME · DARK

Lucid

Tuned for long hours of reading code.

```python
# Comments stay readable without competing with the code.
from pathlib import Path

class Palette:
    def __init__(self, path: Path, dark: bool = True):
        self.path = path
        self.colors = {}

    def load(self) -> dict[str, str]:
        for line in self.path.read_text().splitlines():
            name, _, value = line.partition("=")
            self.colors[name] = value.strip(' "\n')
        return self.colors  # name -> hex
```

NORMAL palette.py python · 11:12

```
